

The Original Patent-Holder in Hotel Water Cost Recovery.

Reduce hotel water bills up to 20%. 12–18 month ROI. Zero maintenance.

HOW IT WORKS

The WAVE™ Valve uses patented air-compression technology to eliminate metered air from your hotel's water supply. Utility meters charge you for everything in the pipes — including air. The WAVE™ Valve removes that air before the meter, so you only pay for actual water. No flow restriction to guests. Simple solid design with only one moving part. No maintenance. Ever.
